Version 1.0.0 Module Magento – EXIF

Table of Contents

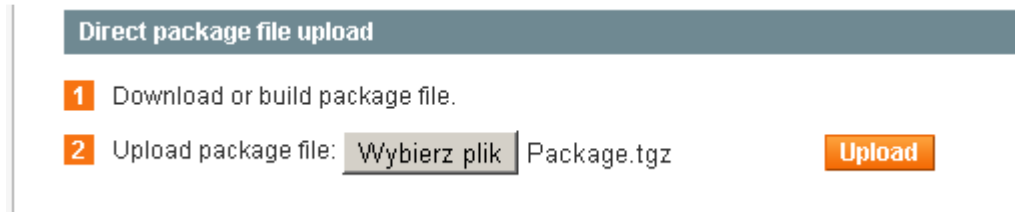

Installation.....	3
Description.....	4
Configuration.....	4

Installation.

Please upload the license file "lic-mag-exif.txt" to the root of magento

To install, use the Magento Connect Manager from the System.

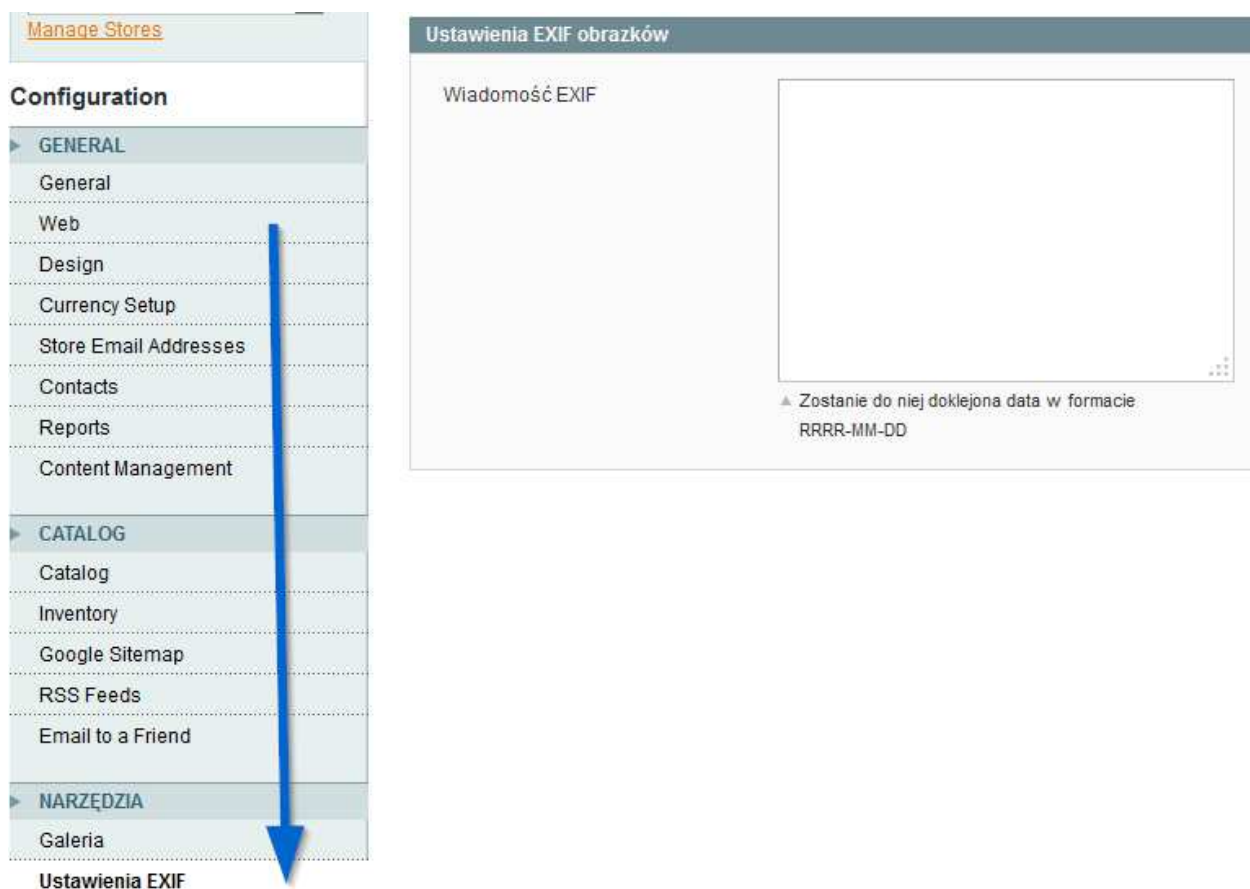

Select the module and click Upload

Description.

The module is added to the product images in JPG format encoded EXIF tag that can be used as proof of origin of the image.

Configuration.

Message to the picture can be set in the configuration panel Administrator (System-> Configuration) in the tab Narzędzia> EXIF Settings> Settings EXIF images:

The image shows two parts of the Magento administrator interface. On the left is the 'Configuration' sidebar menu, where the 'NARZĘDZIA' (Tools) section is expanded, and 'Ustawienia EXIF' is selected. A blue arrow points from this menu item to the right-hand panel. The right-hand panel is titled 'Ustawienia EXIF obrazków' (EXIF image settings). It contains a text input field labeled 'Wiadomość EXIF' (EXIF message) and a date format hint below it: '▲ Zostanie do niej dolejona data w formacie RRRR-MM-DD' (▲ The date will be appended to it in the format RRRR-MM-DD).

The message when you save will also be appended date in YYYY-MM-DD.

To add EXIF tags to all images in the same tab, select "Add to all images":

Ustawienia EXIF

Dodawanie do wszystkich obrazków

Wyszukaj pliki .jpg i dodaj EXIF
